REFINED SIMPLICITY

For 35 years we've brought our Refined Simplicity philosophy to provide industry leading bicycle products that are fun to ride, useful and easy to understand. When introducing new features, they have to play into this triad. In 2024 many of our completely new e-bike ready forks feature optional ABS mounts for safer and more controlled braking. Whether commuting the kids to school or shredding an enduro track, we have options ready from 20" wheels and 60mm of travel to 29" shredders with 180mm of trail smashing goodness. More than ever before, we have a full and comprehensive line of products, from cargo to MTB long travel, from XC to gravel and comfort, urban and utility and more. Unplugged or electrified, we don't discriminate between weekend warrior and pro, we just want you to be stoked on cycling.

Here at SR SUNTOUR we also love cycling and that is reflected in the range of products we proudly manufacture. We are not shy to design forks with our World Cup winning PCS and EQ systems and equip them with mounting features for fenders, lamps and ABS to make your daily adventure pleasant and safe. Enjoy riding bikes!

EQ EQUALIZER SYSTEM

SET YOUR SAG AND THE EQUALIZER (EQ) AIR NEGATIVE SPRING SYSTEM WILL BALANCE IT FOR YOU.

Our tradition of product evolution brings our forks into a brand new era with our all-new air EQ system. The EQ system perfectly equalizes the rider's weight to the spring curve which results in the exact positioning and support you need. This results in a customized feel for each individual rider optimizing sag and volume control. Pairing the EQ system with the external damping adjustments of our PCS cartridges results in a supple coil spring feel in a lightweight, progressive and easy to adjust air spring package. You can set your sag according to your intended riding style and the EQ system

will automatically balance it with the right amount of negative spring force helping you to create a precise and effortless tune. The EQ system will improve fork sensitivity of small repetitive bumps while providing plenty of mid-stroke support for those bigger hits resulting in enhanced comfort and performance when riding any kind of terrain.

FUNCTIONAL FEATURES

- Greater, automatic spring adjustability based on the riding style and weight of the rider
- Improved fork sensitivity for those small but fast repetitive bumps
- Super consistent damping performance in tandem with the PCS system

PCS - PISTON COMPENSATOR SYSTEM

THE ULTIMATE IN TRACTION, CONTROL AND CONSISTENCY

With over 20 years of refinement, SR SUNTOUR's Cartridge Science Program has created the most controlled, consistent and functional dampers we've ever produced. PCS is a simple and repeatable way of reducing cavitation (air and oil mixing and creating pressure). Less cavitation means more predictable damping performance, and with cartridges being tested to over 200,000 cycles that performance should last run after run, ride after ride. When it does need servicing, our Quick Service Product (QSP) Philosophy, ensures that you'll spend less time in the work stand and more time on the trail.

3CR PCS

With easy 3-position compression adjustment you can go from open to mid to firm at the touch of a lever. Backed with our PCS system to reduce cavitation you can instantly tune your ride to the terrain.

Open: Supportive but ready for big hits, varying terrain and downhills

Mid: Extra support for hard charging and undulating terrain

Firm: Efficient pedaling for roads, smooth climbing and big sprints

2CR PCS

Take all the guesswork out of your suspension with easy 2 position on-the-fly adjustment. Whether you choose the fully open position to tame the terrain or the firm position for the utmost in pedaling efficiency the 2CR PCS cartridge has you covered.

QSP_QUICK SERVICE PRODUCTS

Refined simplicity is our guiding principle. »High performance made simple« is the foundation of every one of our developments. Our PCS cartridge system is fully synchronized with our approach to applying simplicity to our designs. It not only aims to be technologically sophisticated but also to be user-friendly and low maintenance. Setup and maintenance are quick and easy and at a lower cost. All parts can be disassembled and the system can be bled and re-assembled again without the use of special tools. We call them QSP - Quick Service Products. Offering quick service and state of the art technology to our customers across all levels of riding is the philosophy behind QSP.

QSP IS APPLIED THROUGHOUT OUR PRODUCT LINE

Here are some examples:

- Travel changes in both suspension forks and rear shocks
- Integrated fenders
- Sealed, fully serviceable cartridges
- Minimal number of tools needed to service your SR SUNTOUR products
- Faster and easier service than our competitors
- Lubrication/air burp valves on the RUX and DUROLUX for consistent runs
- Easy to install air volume spacers to customize your ride for your terrain

ABS-READY FORKS BY SR SUNTOUR

MORE TRACTION. MORE CONTROL.

SR SUNTOUR has collaborated with leading industry partners to bring Anti-lock Braking Systems (ABS) to our forks across a range of cycling disciplines. The result is the superb damping, stability, and precise steering of our forks with the control and confidence inspired by direct-mount ABS for modern urban, sport, and e-MTB bicycles.

ADVANTAGES OF ANTI-LOCK BRAKING SYSTEMS

- More traction & control
- Enhanced stability & comfort
- Increased safety

SR SUNTOUR ABS FEATURES

- Integrated design for a safe & strong ABS Unit mounting solution
- Increased fork stiffness supports ABS braking
- Robust direct mount for applications from urban to E-MTB
- Easy assembling following our Refined Simplicity approach
- Wheel speed sensor integration reduces risk of impact and contamination
- Safe and clean cable routing

RUX

RUX38 CONTINUED EVOLUTION OF BIG MOUNTAIN

The continued evolution of the RUX has gotten us to the RUX 29, the biggest and baddest SR SUNTOUR RUX yet. The RUX's list of accomplishments continues to grow with numerous appearances on the World Cup Downhill, Crankworx and Red Bull Rampage podiums. Our newest version accepts 29" wheels and features our Air EQ system which perfectly equalizes the rider's inputs to the spring curve creating the ultimate in support for whatever the mountain can throw at you. The PCS backed fully-sealed R2C2 and RC2 dampers will track every movement with precision while allowing you to fine tune the fork to your intended riding style. Once your ride is over, our QSP philosophy means you can quickly maintain and service your fork so you're ready for your next shred.

MODEL	RUX38 BOOST

DUROLUX

DUROLUX38 EXTRA ROWDY

We've taken everything you love about the DUROLUX and made it badass! The new DUROLUX38 is ready to take on even the most hectic lines with 38mm stanchions for added stiffness and even more precision. The DUROLUX38 is the choice for freeride, gravity riding and the most demanding enduro courses and can handle anything you can throw at it. Whether you're competing against the clock or against the terrain the DUROLUX38 will instil all the confidence needed to get you safely and smoothly down the trail and with our legendary durability you can turn around and do it again and again! Designed tough and smart with A7000 stanchions and hollow forged crown, QSP ports*, an integrated fender, fully sealed and serviceable R2C2 and RC2 PCS dampers and extra volume spacers included for easy spring curve adjustment. Our tradition of product evolution brings the DUROLUX into a new era with the Air EQ system, perfectly equalizing the rider's weight to the spring curve resulting in exact positioning and support.

TRIAIR2

TRIAIR2 ESTABLISH TRACTION

Split second reactions to rapidly approaching terrain must be translated smoothly through the bike for the rider to have genuine control. The TRIAIR2 was designed to handle the abuse of long, challenging descents while maintaining consistent damping, holding a steady line. The TRIAIR2 has a reinforced damping setting as well as a new bigger steel shaft for improved mid-stroke support. The redesigned piggyback offers a better oil flow and clearance with more bikes. Also features an air-backed IFP, riders can adjust this as well as easy volume spacer adjustment to dial in the desired spring curve. The 3CR damping allows for 3 position compression adjustment and 8-clicks of rebound range to create the proper balance between fork and shock. TRIAIR2 is QSP designed for reliability and serviceability, and is the perfect match for the DUROLUX, AURON, and AION forks.

MODEL	TRIAIR2

THE FEATURE PACKED FAMILY FROM CITY TO SUMMIT

Mountain? City? Trail? Urban? Not anymore. Bicycle manufacturers are obliterating the classic bicycle categories of yesteryear. Today, your full suspension bike will get you around town and your commuter can carve up the trails. Our new 36mm fork family is born from the idea that what makes a fork a great performer off-road is also a huge advantage in the city. Performance, practicality, and steering precision across disciplines: from city to summit.

All fork models are designed with a stiff 36mm chassis (with optional ABS mount) for precision steering and braking. Boost hub spacing increases tire clearance, while pressure release- and grease ports allow for easy maintenance. All forks have short- and long fender mounts, and the Mobie36 has an integrated headlight mount that cleans up the cockpit and reduces fender shadows. Internally, our PCS performance damper and negative EQ air spring let you easily dial-in your perfect suspension settings. With 36 Ø we help you find the best fork for your ride, without telling you how to ride it.

MODEL	AION36X, MOBIE36, ZERON36X

AION

AION36X A STEP ABOVE

Our AION36X is the choice for your all-mountain adventures, whether it be long backcountry rides or hitting up your local trails. With up to 160mm of travel and stiff 36mm stanchions this reinforced, ebike ready fork is down for anything you put in front of you but at a price that won't ruin your bike budget. With our EQ air negative spring system and a sealed PCS damper you'll be trail ready in no-time with amazing small bump compliance and loads of support to soak up the extra rough stuff. We also didn't forget the details with an integrated fender, mounting points for urban fender for daily comfort and clearance for big tires and brake rotors.

MODEL	AION36 X BOOST EQ
INTENDED USE	TRAIL, AM
TRAVEL	120, 130, 140, 150, 160mm
WHEEL SIZE	27.5", 29"
SPRING	AIR EQ

BOTTOM CASE	MAGNESIUM
AXLE TYPE	15AH2-110, OPTION 15LH-110
FEATURES	TRAIL FENDER, LONG FENDER MOUNTS, ABS MOUNT OPTION

ZERON

ZERON36X RIDE MORE, SPEND LESS

The new ZERON36X Air EQ is one of the lightest value performance forks on the market, yet burly enough to be e-bike rated. Featuring our Air EQ system for precise and effortless tuning, you'll be up and running in no-time. Available in 36mm stanchions and featuring a high-performance sealed cartridge and integrated fender, the ZERON36X is not afraid of the rough stuff either and provides precise steering next to wider tire clearance. Full flexibility in usage is granted through option for applying urban fenders, OEM-optional mounts for ABS application ensure a maximum of safety as well as the possibility to mount big brake rotors.

MODEL	ZERON36 X BOOST

MOBIE36 READY FOR EVERYTHING

MOBIE36-our industry leading fork delivers E-MTB performance with useful features such as an integrated trail fender, mounts for urban fenders, integrated crown lamp mount on a shade-free high position and ABS for safety and comfort. 36mm stanchions and Boost hub spacing offer accurate and stable steering, excellent control and accommodate wider tires. Our EQ air negative spring makes SAG setting effortless, precise and accommodates a wide range of rider weight, together with sealed PCS dampers this adds up to the best settings and comfort in any terrain. To achieve the best level of safety, the MOBIE36 accommodates large disc brakes and comes with optional ABS mounting points.

MODEL	MOBIE36 BOOST EQ

MOBIE34 BOOST & FAMILY MODERN DESIGN FOR THE E-EXPERIENCE

Combine the stability and damping performance of a mountain bike fork, and a polished modern design, and you have MOBIE. Nearly every urban setting is seeing a steep rise in bicycling traffic- economical, environmental, and fun, these commutes only get better. The MOBIE is discreetly a powerful eBike rated urban fork. Featured with 34mm stanchions for control and stability, along with air and coil options. Comes in all the popular urban wheel sizes, including the new 20" & 24" versions for the newest cargo and mobility bikes. For added performance, we include direct brake mounts and a 15x100mm QLOC axle. Integrated fender and light mounts complete the package as so you can ride in any weather at any time of day. The e-Experience is enhanced mobility.

AXON

AXON34 WERX BEYOND XC

When every position matters, whether it's at the front end of an XC race or setting a PR on your local track, the AXON Werx is the weapon of choice. The AXON Werx has seen success at the highest levels of competition, recently winning Olympic Gold and taking the top step at many World Cup events under some of the most impressive athletes in the world. The demands of XC racing are grueling, to succeed requires precision, control and consistency. The AXON34 Werx is in a league of its own, having a one-piece hollow carbon upper and 34mm stanchions that maximize stiffness while maintaining a proper race weight. The new Air EQ System perfectly balances the positive and negative air chamber for exact support and excellent performance for each individual rider and weight. The PCS cartridge and EQ air system combine to give supple small bump compliance while maintaining proper support. All of this in a package that is easy to maintain and service with our QSP philosophy means you'll be on the trail more and in the shop less.

EDGE

EDGE X - FOR LIVING LIFE ON THE EDGE

From modern XC racing to technical trail riding you demand damping performance for the most efficient yet comfortable ride. The EDGE was created to perform as a lightweight and fast forward moving XC racing shock, featuring adjustable compression and rebound damping for a custom, controlled ride. The EDGE X is the latest addition to our growing family. While the EDGE name remains synonymous for short to mid-travel bikes, the X indicates a reinforced and updated structure dealing with the demands modern full suspension ebikes are bringing to the table. Coming in an overhauled and refreshed design, the new EDGE X features a redesigned shaft delivering extra strength right out of the core with improved sliding behavior that creates excellent small bump compliance under heavier loads and stress. This is also supported by a larger negative air chamber to create a smooth ride off the top while delivering the desired support. While we've prioritized comfort, the efficiency of the EDGE X reigns supreme. The efficiency is supported by an increased amount of mid-stroke support when paired with precise rebound damping gives you a calmer ride all while keeping the focus on the forward movement. Historically XC racing bikes have used a full lockout but for the modern full suspension ebike we've developed a firm switch, giving efficiency, but leaving the right amount of travel for the comfortable ride and ultimate traction. So choose the X and go for an Ohh!

EDGE plus

EDGE PLUS THE INLINE ANSWER

Whether pinned on the XC race course or ripping around your rowdy local trails, having reliable rear suspension is essential to success as much as it is to enjoyment. The EDGE Plus can tackle the nasty rock gardens, let you boost jumps on your favorite flow trail, provide endless traction on those loose corners and then give you maximum efficiency back up to the top so you can do it all over again. Available in most popular sizes the EDGE Plus has a variety of external adjustments including remote and partial lockouts, compression and rebound damping control, and easily adjustable volume spacing so you can tune the feel to match your bike, weight and riding style.

RAIDON34X & JR FUN FOR BOTH - KIDS AND ADULTS

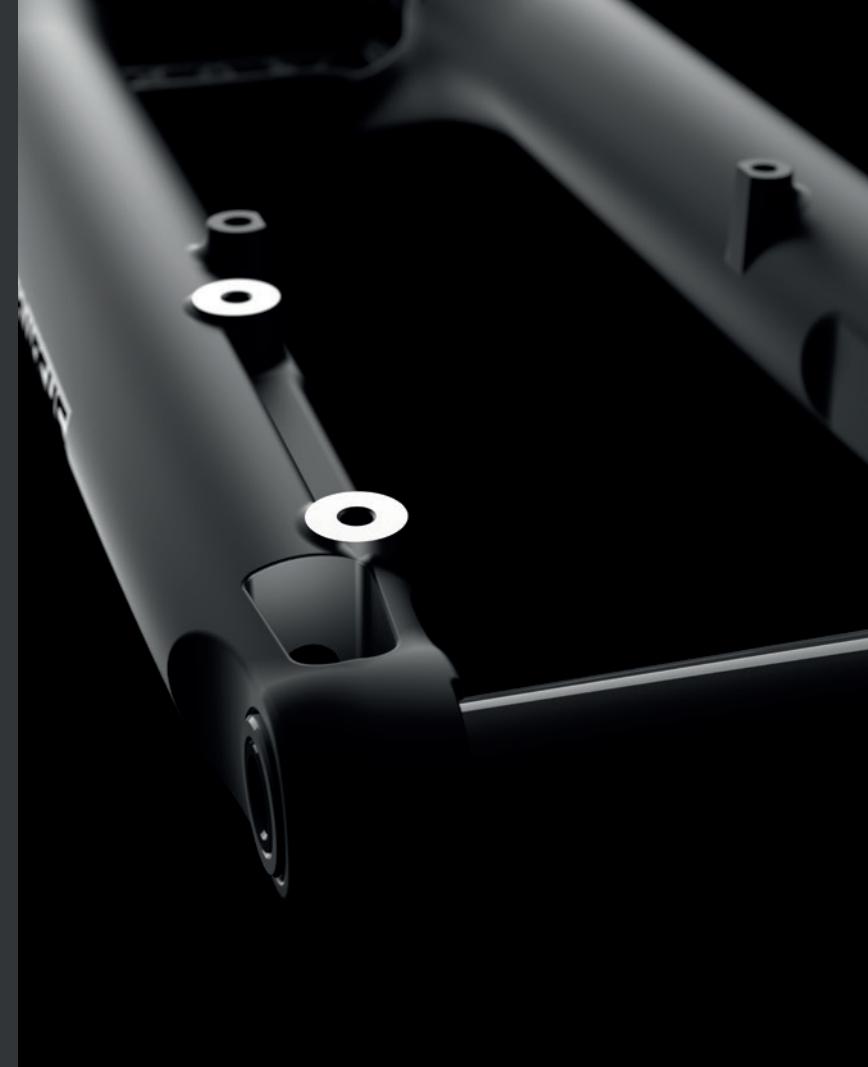

The RAIDON has been part of our portfolio for as long as we can remember. It has always been the epitome of the best value for the money for XC and trail riding and has been constantly updated. For 2023, this means that we have made them ready for E-MTB use and, together with our EQ system, the adjustability will be even easier, more precise and thus more powerful. The integrated trail mudguard keeps the view clear and the long fender mounts can be used to optimize the setup for everyday use. Sealed cartridge and QSP logic complete the package, the 34mm stanchions deliver excellent control quality and stability. Up to 120mm of travel is enough to comfortably go shopping or to keep out of trouble going offroad. What is good for parents should not harm children either. With the Raidon Jr models, we have two real fun drivers in our range that are waiting to be picked up.

GVX - EXPLORE THE ROAD LESS TRAVELED

Performance is rooted in durability and reliability. Whether you're exploring endless gravel roads, racing on the ever-more technical Cyclocross courses, lining up for a 100 mile gravel race or building a sleek new e-Gravel bike, the GVX suspension gravel fork from SR SUNTOUR is for the gravel experience. Suspending you on 32 mm stanchions with travel and damping adjustments create traction, comfort and versatility that puts the GVX in a class of its own. The versatility designed into the GVX is wide reaching, accommodating a variety of tire sizes, riding styles, and conditions. At the end of an all-day adventure or during the last few miles of that gravel century your body will be thanking you for choosing the GVX. For 2023 available as a base level version GVX32-E and - new - as dedicated performance -S version coming with all the bells and whistles aka EQ air negative spring, PCS sealed damping cartridge, 7000 series aluminum stanchions and hollow crown.

SR SUNTOUR

SR SUNTOUR E-BIKE SYSTEM

YOUR DRIVING FORCE

Power, Dynamic, Range; the full extent of what is possible for bicycles is ever increasing, evidenced by the advent of pedal-assist.

SR SUNTOUR's history of innovation and forward-thinking is long and well established. Developments within our E-Bike systems push the realms of possibility beyond the known. It is a time of uncharted exploration for bicycles.

The Top Drive freewheel function enables the rider to maintain steady, consistent motion with or without assistance, achieving the accustomed feel of a freehub. The rear-hub motor provides direct power to the rear-wheel, leading to the active feel without compromises in shifting performance.

Our core philosophy of QSP (Quick Service Product) is a significant aspect of the E-bike system. The maintenance in mind design allows dealers, mechanics and riders ease of service and troubleshooting. Synchronizing the utilization of components simplifies both assembly and access, reducing service time, which in turn means more ride-time. The SR SUNTOUR E-Bike System is refined simplicity for the evolving world of E-bikes.

TOP DRIVE TECHNOLOGY

100% freewheel effect in any situation - even beyond electric support.

QUICK SERVICE PRODUCT

Simple construction and service for uninterrupted performance and longevity.

THE WERX FAMILY

THE SR SUNTOUR WERX PROGRAM IS DESIGNED ON CREATING THE HIGHEST QUALITY PRODUCTS TO MEET THE PERFORMANCE DEMANDS FOR THE WORLD'S TOP ATHLETES IN THE WORLD'S TOP EVENTS.

Our WERX program athletes are a diverse group representing all corners of the mountain bike world. With athletes ranging from World Cup XC racers all the way to competitors in events like Red Bull Rampage and Formation we have a core of athletes and a product testing team second to none. Both the R2C2 cartridge with PCS (Piston Compensator System) and the EQ Equalizer air-forks are conceived and born from hard fought competition, relentless testing and state of the art engineering. With Tom Pidcock winning Olympic Gold and several XC World Cup races in 2021 and 2022 and Jordan Sarrou being crowned XCO World Champion our XC products are truly race proven. We also sponsor many Downhill riders and teams including the UR Team, Beyond Racing and others and have taken several World Cup and Crankworx Downhill wins showing how strong and fast we can be. But, the WERX program is more than just racing. It takes "Race Proven Engineering" to the BIG mountain freeride world. Riders like Carson Storch, Robin Goomes, Olivier Cuvet, Elliott Lapotre, Brooke Trine, Alex Volokhov, Gemma Corbea, Brett Tippie, Jordy Scott, Mark Matthews and others push our products to the limits and give vital feedback to make our award winning products even better. And they produce some sick edits to help inspire you to get out there. We even have legendary riders like Kyle Warner and Hans Rey pushing the limits on what's possible on a mountain bike and sharing it with the world via social media and YouTube. The SR SUNTOUR WERX athletes are more than just a group of people who ride bikes, they're part of our family and our team.

EQ EQUALIZER

-
- 1 Positive air chamber
 - 2 Transfer port
 - 3 Negative air Chamber
 - 4 Positive air pressure
 - 5 Negative air pressure

SET YOUR SAG AND THE EQUALIZER (EQ) AIR NEGATIVE SPRING SYSTEM WILL BALANCE IT FOR YOU.

Our tradition of product evolution brings our forks into a brand new era with our all-new air EQ system. The EQ system perfectly balances positive and negative spring independent from rider weight, which results in amazing performance and precise support across the range. This customizes feel for each individual rider optimizing SAG and volume control. Pairing the EQ system with the external damping adjustments of our PCS cartridges promise a supple coil spring feel in a lightweight, progressive and easy to adjust air spring package. You can set your SAG according to your intended riding style and

the EQ system will balance it with the right amount of negative spring force helping you to create a precise and effortless tune. The EQ system will improve fork sensitivity of small repetitive bumps while providing plenty of mid-stroke support for those bigger hits resulting in enhanced comfort and performance when riding any kind of terrain.

FUNCTIONAL FEATURES

Greater, automatic spring adjustability based on the riding style and weight of the rider

- Improved fork sensitivity for those small but fast repetitive bumps
- Super consistent damping performance in tandem with the PCS system

PCS – PISTON COMPENSATOR SYSTEM

MORE TRACTION, CONTROL AND CONSISTENCY

LOW SPEED COMPRESSION

HIGH SPEED COMPRESSION

THE ULTIMATE IN TRACTION, CONTROL AND CONSISTENCY

With over 20 years of refinement, SR Suntour's Cartridge Science Program has created the most controlled, consistent and functional dampers we've ever produced. PCS is a simple and repeatable way of reducing cavitation (air and oil mixing and creating pressure). Less cavitation means more predictable damping performance, and with cartridges being tested to over 200,000 cycles that performance should last run after run, ride after ride. When it does need servicing, our Quick Service Product (QSP) Philosophy, ensures that you'll spend less time in the work stand and more time on the trail.

3CR PCS

With easy 3-position compression adjustment you can go from open to mid to firm at the touch of a lever. Backed with our PCS system to reduce cavitation you can instantly tune your ride to the terrain. Open: Supportive but ready for big hits, varying terrain and downhills Mid: Extra support for hard charging, technical climbing and undulating terrain Firm: Efficient pedaling for roads, smooth climbing and big sprints.

2CR PCS

Take all the guesswork out of your suspension with easy 2 position on-the-fly adjustment. Whether you choose the fully open position to tame the terrain or the firm position for the utmost in pedaling efficiency the 2CR PCS cartridge has you covered.

PCS CARTRIDGES

R2C2-PCS

HIGH AND LOW SPEED COMPRESSION ADJUST HIGH AND LOW SPEED REBOUND PCS SYSTEM (PISTON COMPENSATOR SYSTEM)

Race proven WERX cartridge with PCS (Piston Compensator system) floating piston provides consistent damping in all conditions, eliminating cavitation

- High speed compression piston provides a larger adjustable range
- Adjustable high speed rebound design provides fast recovery for improved ride height position
- Updated internal seals greatly improved durability for Trail, Enduro and DH riding
- Forged alloy adjust knobs with integrated design
- Light "Click" index feeling for easy and sure operation

RC2-PCS

HIGH AND LOW SPEED COMPRESSION ADJUST REBOUND ADJUST PCS SYSTEM (PISTON COMPENSATOR SYSTEM)

Race proven WERX cartridge with PCS (Piston Compensator system) floating piston provides consistent damping in all conditions, eliminating cavitation

- High speed compression piston provides a larger adjustable range
- Updated internal seals greatly improved durability for Trail, Enduro and DH riding
- Forged alloy adjust knobs with integrated design
- Light "Click" index feeling for easy and sure operation

RC-PCS

LOW SPEED COMPRESSION ADJUST REBOUND ADJUST PCS SYSTEM (PISTON COMPENSATOR SYSTEM)

Race proven WERX cartridge with PCS (Piston Compensator system) floating piston provides consistent damping in all conditions, eliminating cavitation

- Updated internal seals greatly improved durability for Trail, Enduro and DH riding
- Forged alloy adjust knobs with integrated design
- Light "Click" index feeling for easy and sure operation

R-3CR-PCS

**3 POSITIONS OF COMPRESSION ADJUST
LOW SPEED REBOUND ADJUST
REMOTE LOCK OUT
PCS SYSTEM (PISTON COMPENSATOR SYSTEM)**

Race proven WERX cartridge with PCS (Piston Compensator system) floating piston provides consistent damping in all conditions, eliminating cavitation

- Remote actuated 3 step (firm, medium, open) low speed compression adjustment. Low speed rebound damping adjust
- Forged alloy adjust knobs with integrated design
- Ergonomic design remote lock lever for faster and easier operation

R-2CR-PCS

**2 POSITIONS OF COMPRESSION ADJUST
LOW SPEED REBOUND ADJUST
REMOTE LOCK OUT
PCS SYSTEM (PISTON COMPENSATOR SYSTEM)**

Race proven WERX cartridge with PCS (Piston Compensator system) floating piston provides consistent damping in all conditions, eliminating cavitation

- Remote actuated 2 step (firm, open) low speed compression adjustment. Low speed rebound damping adjust
- Forged alloy adjust knobs with integrated design
- Ergonomic design remote lock lever for faster and easier operation

2CR-PCS

**2 POSITIONS OF COMPRESSION ADJUST
LOW SPEED REBOUND ADJUST
PCS SYSTEM (PISTON COMPENSATOR SYSTEM)**

Race proven WERX cartridge with PCS (Piston Compensator system) floating piston provides consistent damping in all conditions, eliminating cavitation

- 2 step (firm, open) low speed compression adjustment. Low speed rebound damping adjust
- Updated internal seals greatly improved durability for Trail, Enduro riding
- Light "Click" index feeling for easy and sure operation

3CR-PCS

3 POSITIONS OF COMPRESSION ADJUST LOW SPEED REBOUND ADJUST PCS SYSTEM (PISTON COMPENSATOR SYSTEM)

Race proven WERX cartridge with PCS (Piston Compensator system) floating piston provides consistent damping in all conditions, eliminating cavitation

- 3 step (firm, medium, open) low speed compression adjustment. Low speed rebound damping adjust.
- Updated internal seals greatly improved durability for Trail, Enduro and DH riding
- Light "Click" index feeling for easy and sure operation

RLRC-PCS

LOW SPEED COMPRESSION ADJUST REBOUND ADJUST REMOTE SPEED LOCK PCS SYSTEM (PISTON COMPENSATOR SYSTEM)

Race proven WERX cartridge with PCS (Piston Compensator system) floating piston provides consistent damping in all conditions, eliminating cavitation

- 3 in 1 function: Lock out, low speed compression adjust & rebound adjust in one cartridge.
- Drastic improvement of riding efficiency & its adjustability for cross country & trail ride
- Forged alloy adjust knobs with integrated design
- Updated internal seals greatly improved durability for Trail, Enduro and DH riding
- Light "Click" index feeling for easy and sure operation
- Ergonomic design remote lock lever for faster and easier operation

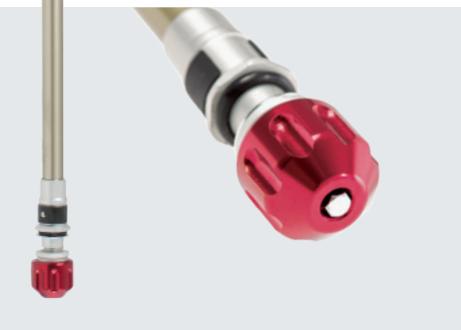

RLR-PCS

REBOUND ADJUST REMOTE SPEED LOCK PCS SYSTEM (PISTON COMPENSATOR SYSTEM)

Race proven WERX cartridge with PCS (Piston Compensator system) floating piston provides consistent damping in all conditions, eliminating cavitation

- Hydraulic Remote Lockout
- Drastic improvement of riding efficiency & its adjustability for cross country & trail ride
- Forged alloy adjust knobs with integrated design
- Updated internal seals greatly improved durability for Trail, Enduro and DH riding
- Light "Click" index feeling for easy and sure operation

ADJUSTABLE AIR CHAMBER VOLUME

VOLUME SPACER LOGIC

Adjust your spring curve by using different amount of rubber volume spacers. This function allows the rider to choose between a more linear or a more progressive characteristic curve. More spacers for more progression. Less spacers for more comfort. Visit www.srsuntour.com for tech videos and product manuals with detailed information.

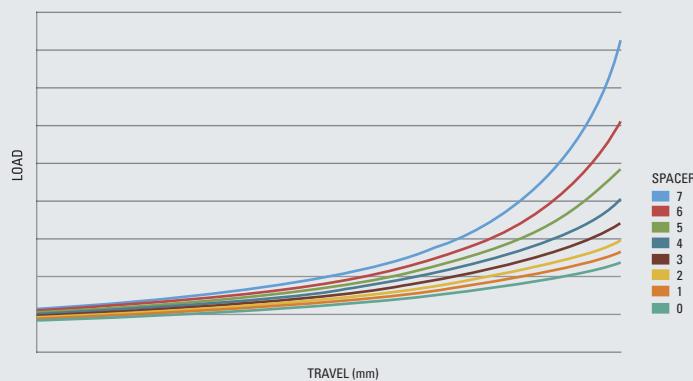

Air spring curve can be widely adjustable, which can bring the extra comfort wider range of total weight of "bike + rider + luggage".

Q-LOC AND THRU AXLE SYSTEMS

LOC

Q-LOC is a patented quick release system for thru axles fully deserving of the name "quick". Q-LOC 2 is the logical evolutionary step, guaranteeing 100% compatibility with all kinds of hub axle designs. A simple push and a little twist of the nut enables a quick removal of the axle. Exchanging the axle is as fast as extracting the axle thanks to the patented expander design which smoothly passes the thru axle and latches safely with a reassuring click sound. Safety and speed is crucial when it comes to pressurised wheel changes during a race. Q-LOC2 offers both in a super lightweight axle (Q-LOC2-Ti 70g).

DAMPING ADJUSTMENT

3CR

3 positions of compression (firm setting, medium setting and open setting) with rebound adjust

2CR

2 positions of compression (firm setting and open setting) with rebound adjust

RC

Low speed compression and low speed rebound damping adjust

R

Low speed rebound adjust
= 1x adjust sufficient

R

Low speed rebound damping adjust

R-3CR

Remote Lockout with 3 positions of compression (firm setting, medium setting and open setting) with low speed rebound damping adjust

R-2CR

Remote Lockout (with firm compression setting and open compression setting) with low speed rebound damping adjust

RLR / RLR8

Remote version with low speed rebound / and Lock Out 80%

LOR / LOR8

LOR: 2-step compression adjust open/lockout with low speed rebound adjust / LOR8: 2CR = 2-step compression adjust with open/ firm with low speed rebound adjust

LO

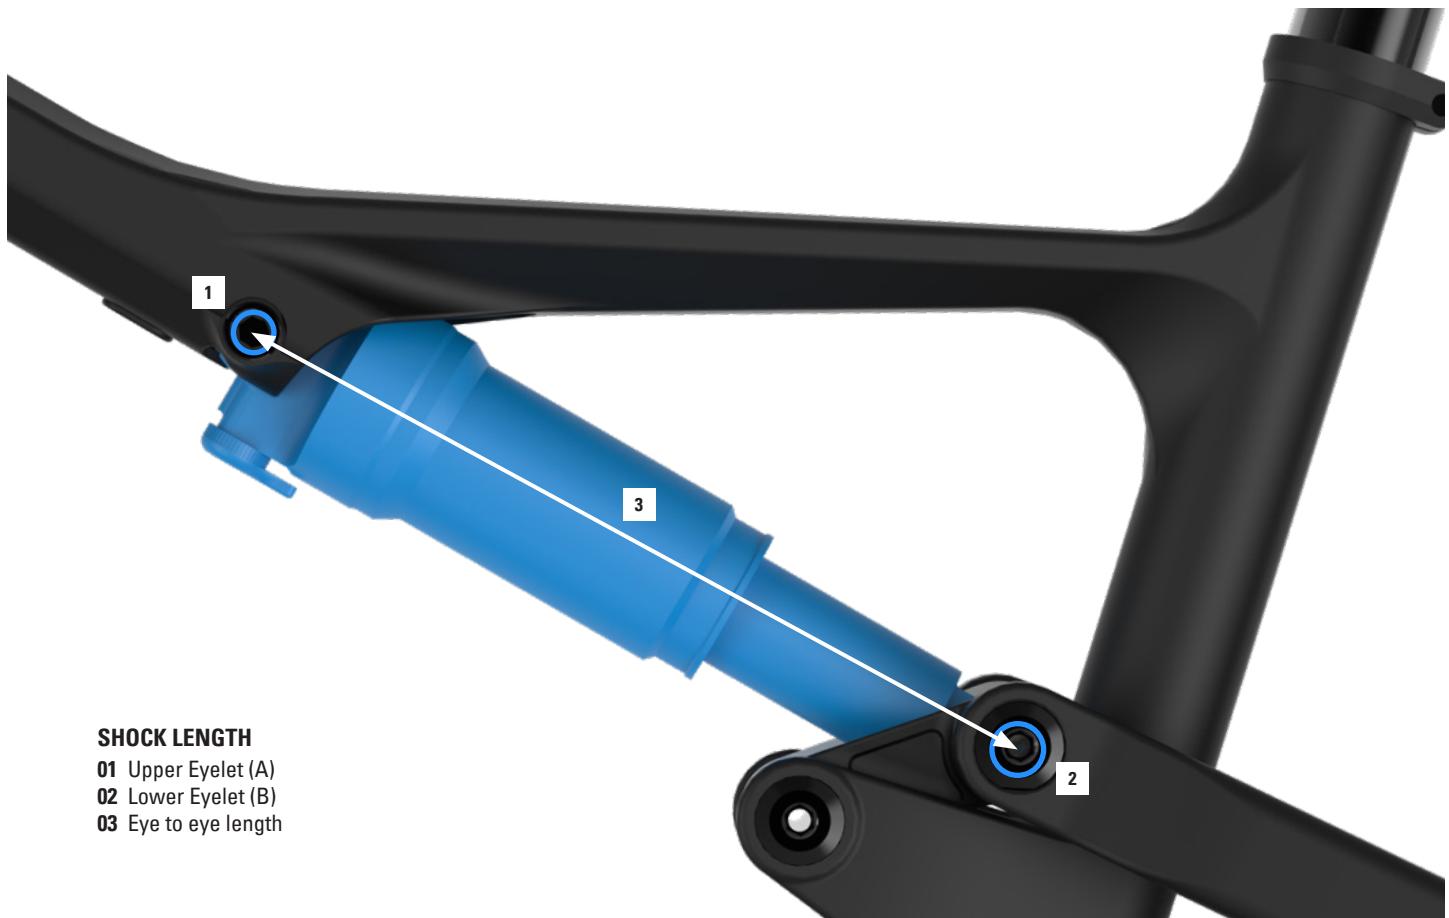

Hydraulic Lockout with low speed compression

● Compression damping adjust

● Rebound damping adjust

SHOCK LENGTH - HOW TO MEASURE TOTAL LENGTH / STROKE LENGTH

SHOCK LENGTH

- 01 Upper Eyelet (A)
- 02 Lower Eyelet (B)
- 03 Eye to eye length

STROKE LENGTH

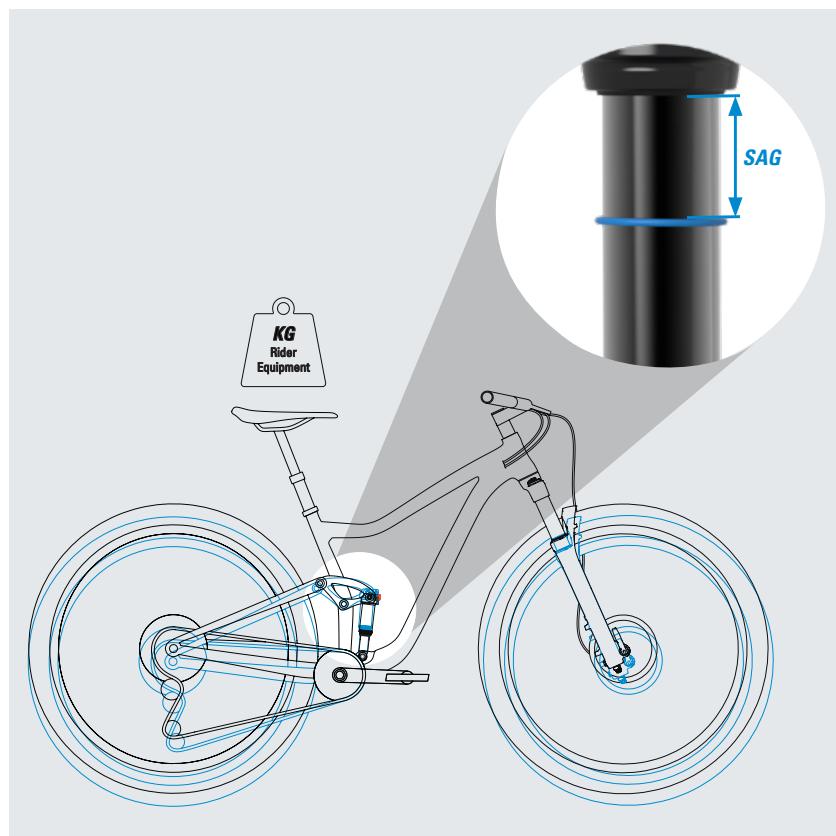

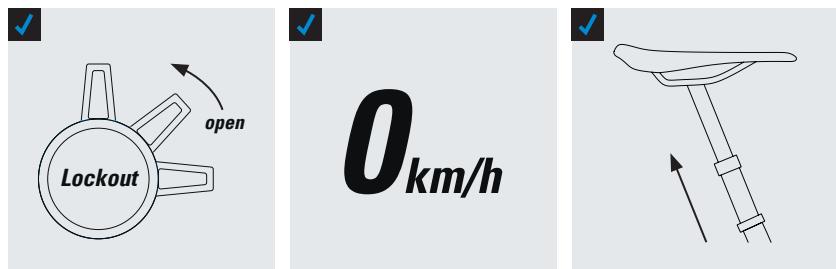

STROKE LENGTH

- 01 Measure the eye to eye length
- 02 Attach a shock pump and slowly remove all the air from the shock. Compress the shock fully and measure the eye to eye length again.
- 03 Subtract this measurement from the initial eye to eye length to find the usable stroke.

SAG - HOW TO MEASURE SAG

TRAVEL (mm) METRIC / TRUNNION	TRAVEL (mm) IMPERIAL	20% SAG (mm)	25% SAG (mm)	30% SAG (mm)
30	-	6	7,5	9
-	31	6.2	7.75	9.3
35	-	7	8.75	10.5
-	38	7.6	9.5	11.4
40	-	8	10	12
-	44	8.8	11	13.2
45	-	9	11.25	13.5
50	-	10	12.5	15
-	51	10.2	12.75	15.3
55	-	11	13.75	16.5
-	57	11.4	14.25	17.1
60	-	12	15	18
-	63	12.6	15.75	18.9
65	-	13	16.25	19.5
70	-	14	17.5	21
75	-	15	18.75	22.5

ADJUSTABLE AIR CHAMBER VOLUME

AIR VOLUME SPACER

SPACER POSITIV

Manage progression rate
Bottomless feeling

SPACER NEGATIV

Manage beginning
Stroke sensitivity

→ Add or remove your desired
amount of air volume spacers

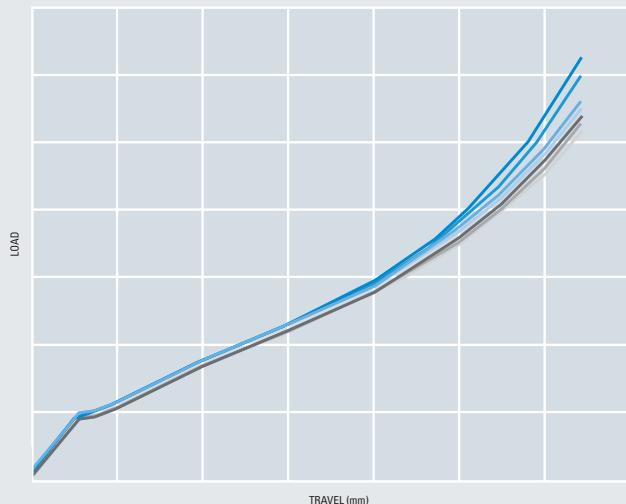

→ Push downward to remove
the high volume air sleeve

AIR CHAMBERS

- 01 Positive air chamber
- 02 Negative air chamber

EXAMPLE SPRING CHARACTERISTIC: EDGE AIR

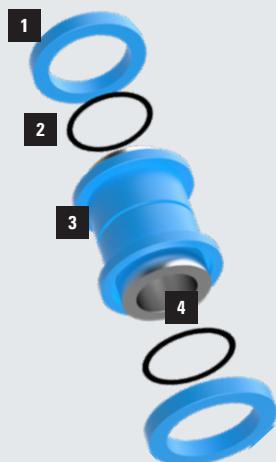

Shock size 230x65; Pos Air Pressure 100psi; IFP pressure 300 psi

BUSHING - PARTS

7-PIECE BUSHING

- 01 Eyelet bushings
- 02 Sealing rings
- 03 Igus bushings
- 04 Axle / pin

3-PIECE BUSHING

- 01 Eyelet bushings
- 02 DU bushing

BUSHING - HOW TO MEASURE HARDWARE SIZE

1 Width

2 Bolt diameter

SERVICE DEALER NETWORK

BLESSED BY SR SUNTOUR TUNING BASE

The SR SUNTOUR Service Dealer Network has been developed in line with our Quick Service Product philosophy, ensuring that it's as easy as possible for local dealers to maintain and service our products. In combination with individual dealer training, we are able to offer you the highest level of local service with competent and effective customer service. This is guaranteed through a permanent stock of essential spare parts which every Service Dealer carries. Regardless of whether it's the service or maintenance of your fork, first-time buyer consultation, old equipment or new, or in-depth enquiries about SR SUNTOUR products, the Service Dealer Network is there for you.
